

Ahmed Maher

Junior Cloud & DevOps Engineer

[linkedin.com/in/ahmed-maher-645b95249](https://www.linkedin.com/in/ahmed-maher-645b95249) | github.com/ahmedmaher-IT | eng.ahmed.maher.it@gmail.com

01006690838 | Cairo , Egypt | Military Status: Exempted

Professional Summary

Junior Cloud & DevOps Engineer with hands-on experience in cloud infrastructure, automation, containerization, and Kubernetes. Experienced with AWS, Terraform, Docker, Jenkins, Ansible, and GitOps using ArgoCD. Strong foundation in CI/CD, observability, and DevSecOps practices.

Education

National Telecommunication Institute (NTI) | Professional DevSecOps Engineer Track 07/2026 – 11/2026

HireReady Initiative — 4-Month Professional Program | Smart Village, Giza

- Gained hands-on **experience in Cloud, DevOps, Kubernetes, and IaC** through practical labs and projects.
- Applied **best practices in CI/CD, containerization, monitoring, and DevSecOps** across cloud environments.

The Egyptian E-Learning University (EELU) - Bachelor of Computer Science

2021 – 2025

Major: Information Technology

Graduation Project: Smart Diet Recommendation System using Machine Learning **Evaluation:** Excellent

Internships

BARQ Systems, Trainee Network & Cybersecurity

06/2026 – 07/2026 | Cairo , Egypt

- Trained in network & cybersecurity fundamentals, including firewall, VPN, and Juniper routing.

Intercom Enterprises, Intern IBM SW Automation Tools (BPM)

07/2025 – 09/2025 | Nasr City , Egypt

- Designed and customized user interfaces (coaches) to support process automation flows.

Technical Skills

Cloud Platforms — AWS, OpenStack

Linux & Systems — Linux Administration | Bash Scripting

Version Control — Git, GitHub

Containers & Orchestration: — Docker | Kubernetes

Kubernetes Package Management — Helm

Infrastructure as Code — Terraform

Configuration Management — Ansible

CI/CD — Jenkins

GitOps — ArgoCD

Monitoring & Observability — Prometheus, Grafana

DevSecOps (Learning) — SonarQube | Snyk | Gitleaks | HashiCorp Vault

Database — MySQL

Programming & Scripting — Python | Bash | Java

Projects

GitOps Deployment with ArgoCD & Vault , Kubernetes, ArgoCD, HashiCorp Vault

- Implemented GitOps workflow using ArgoCD to automatically sync Kubernetes deployments from a Git repository.
- Configured HashiCorp Vault to manage and inject secrets securely instead of hardcoding them.
- Set up automated rollback on failed deployments through ArgoCD's sync policies.

Kubernetes Monitoring & Helm Deployment , Kubernetes, Helm, Prometheus, Grafana

- Converted a Kubernetes deployment into a Helm chart for templated, reusable configuration.
- Configured Prometheus and Grafana to monitor cluster and application metrics.
- Created custom Grafana dashboards to visualize resource usage and application health.

AWS Cloud Project , Terraform, Docker, AWS (EC2, VPC, Lambda, S3, CloudWatch), GitHub

- Provisioned AWS infrastructure with Terraform, including IAM roles and remote state backend (S3 + DynamoDB).
- Deployed a Dockerized Flask app and used Ansible for configuration management.
- Configured CloudWatch alarms with SNS notifications for infrastructure monitoring.

Linux Infrastructure Automation , Terraform, Ansible, AWS, Linux

- Provisioned AWS infrastructure (VPC, EC2) with Terraform.
- Automated Linux hardening (SSH, firewall, fail2ban) and user/sudo management across multiple servers with Ansible.
- Deployed Prometheus node_exporter to expose live system metrics, resolving real connectivity issues along the way.

CI/CD Pipeline — Dockerized App Deployment , Jenkins, Docker, Terraform, AWS EC2

- Built a Jenkins CI/CD pipeline with GitHub, DockerHub, and AWS EC2.
- Provisioned AWS infrastructure using Terraform (VPC, Subnets, EC2).

Networking Labs, Cisco Packet Tracer, Juniper JNCIA, FortiGate NGFW

- Designed a multi-VLAN enterprise network with inter-VLAN routing and OSPF dynamic routing.
- Practiced Juniper JNCIA routing & deployed a FortiGate VM with firewall policies, NAT, and HA clustering.

Languages

Arabic — Native | English — Advanced

Activities & Soft Skills

Organizing Team Member, Compiler Community (2023) — Organized student events and training sessions to bridge the gap between academia and industry, showing communication, teamwork, and adaptability.
